ADVANCED MATERIALS AND NANOMATERIALS  
SPANISH TECHNOLOGICAL PLATFORM

Funded by:

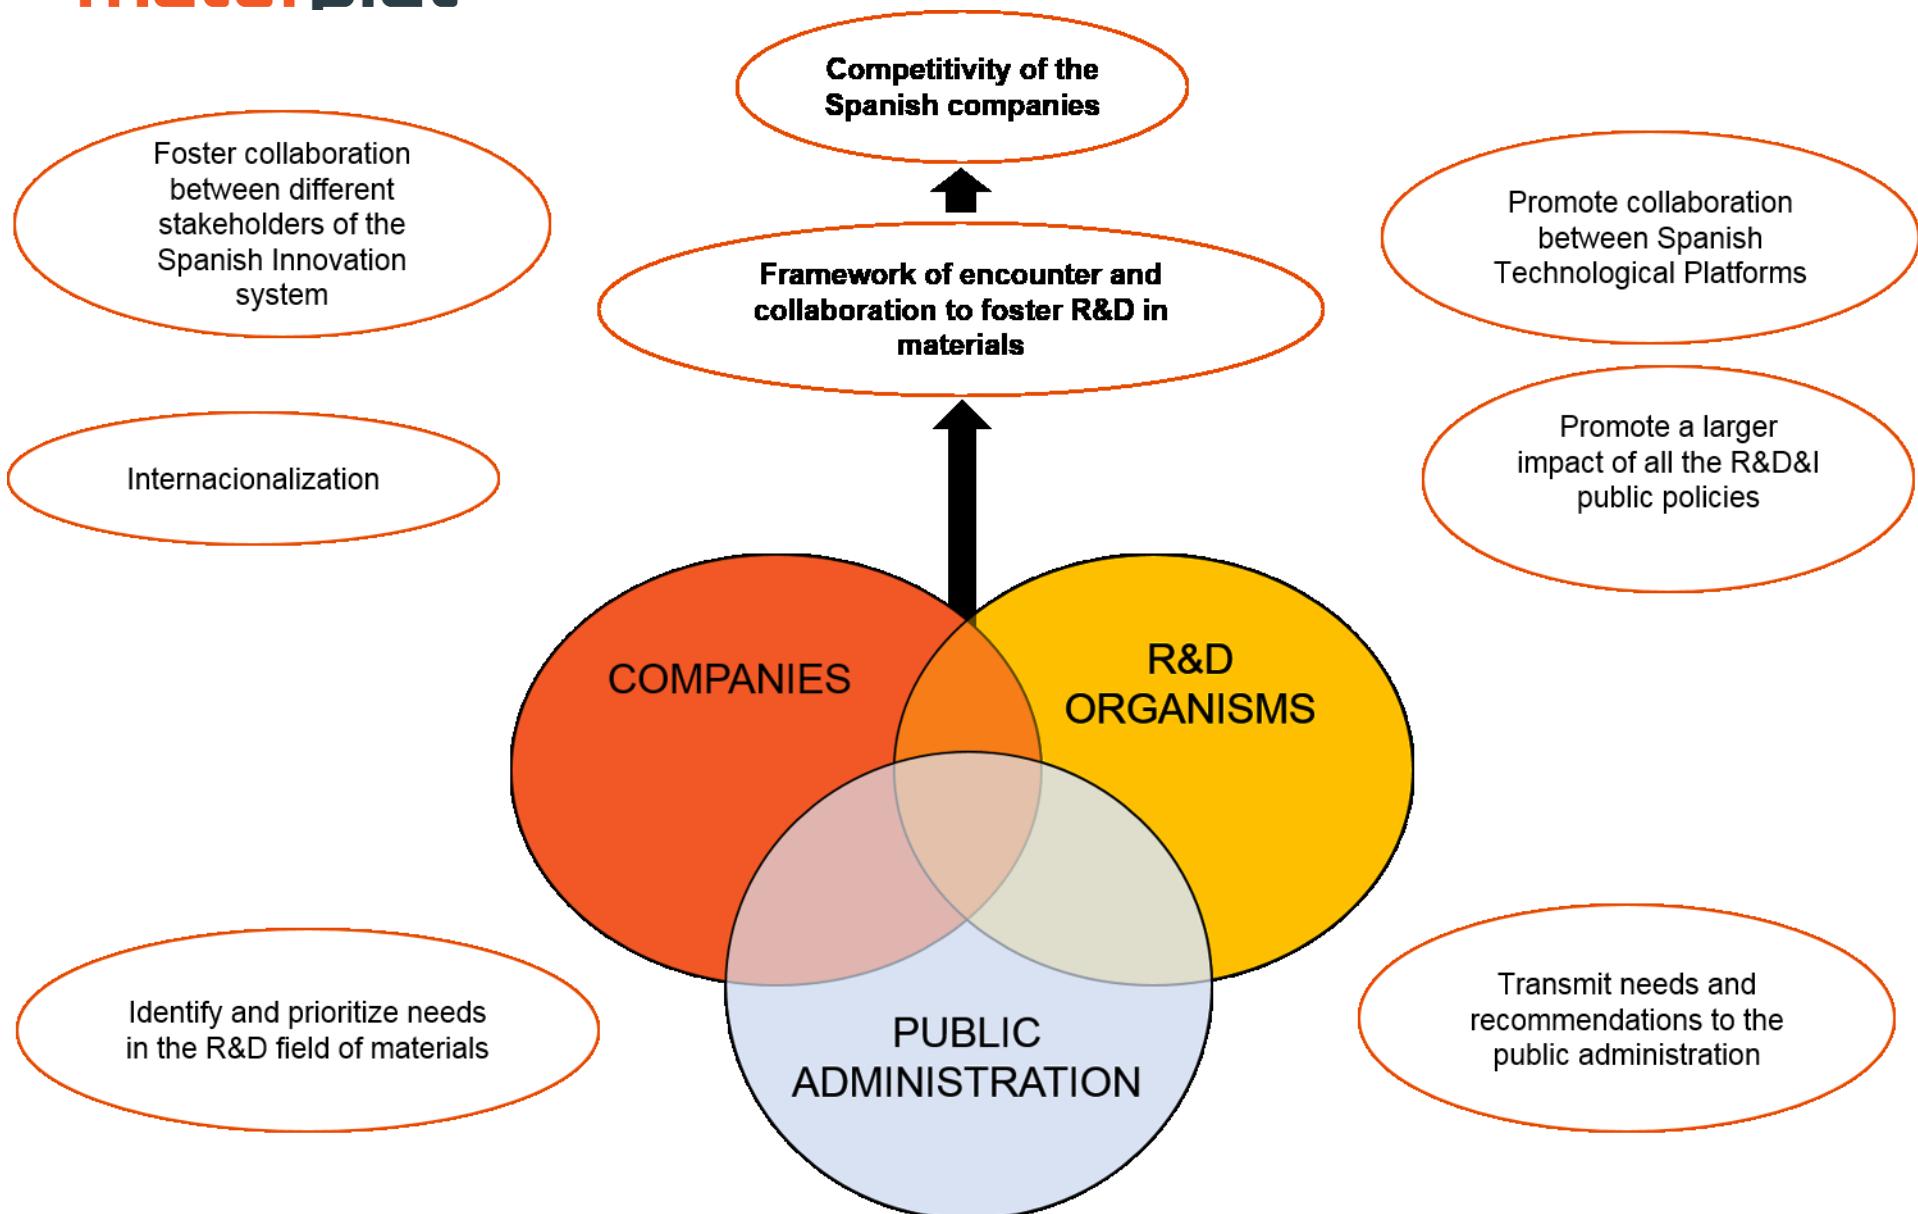

Project Reference: PTR-2016-0821

[www.materplat.org/en](http://www.materplat.org/en)

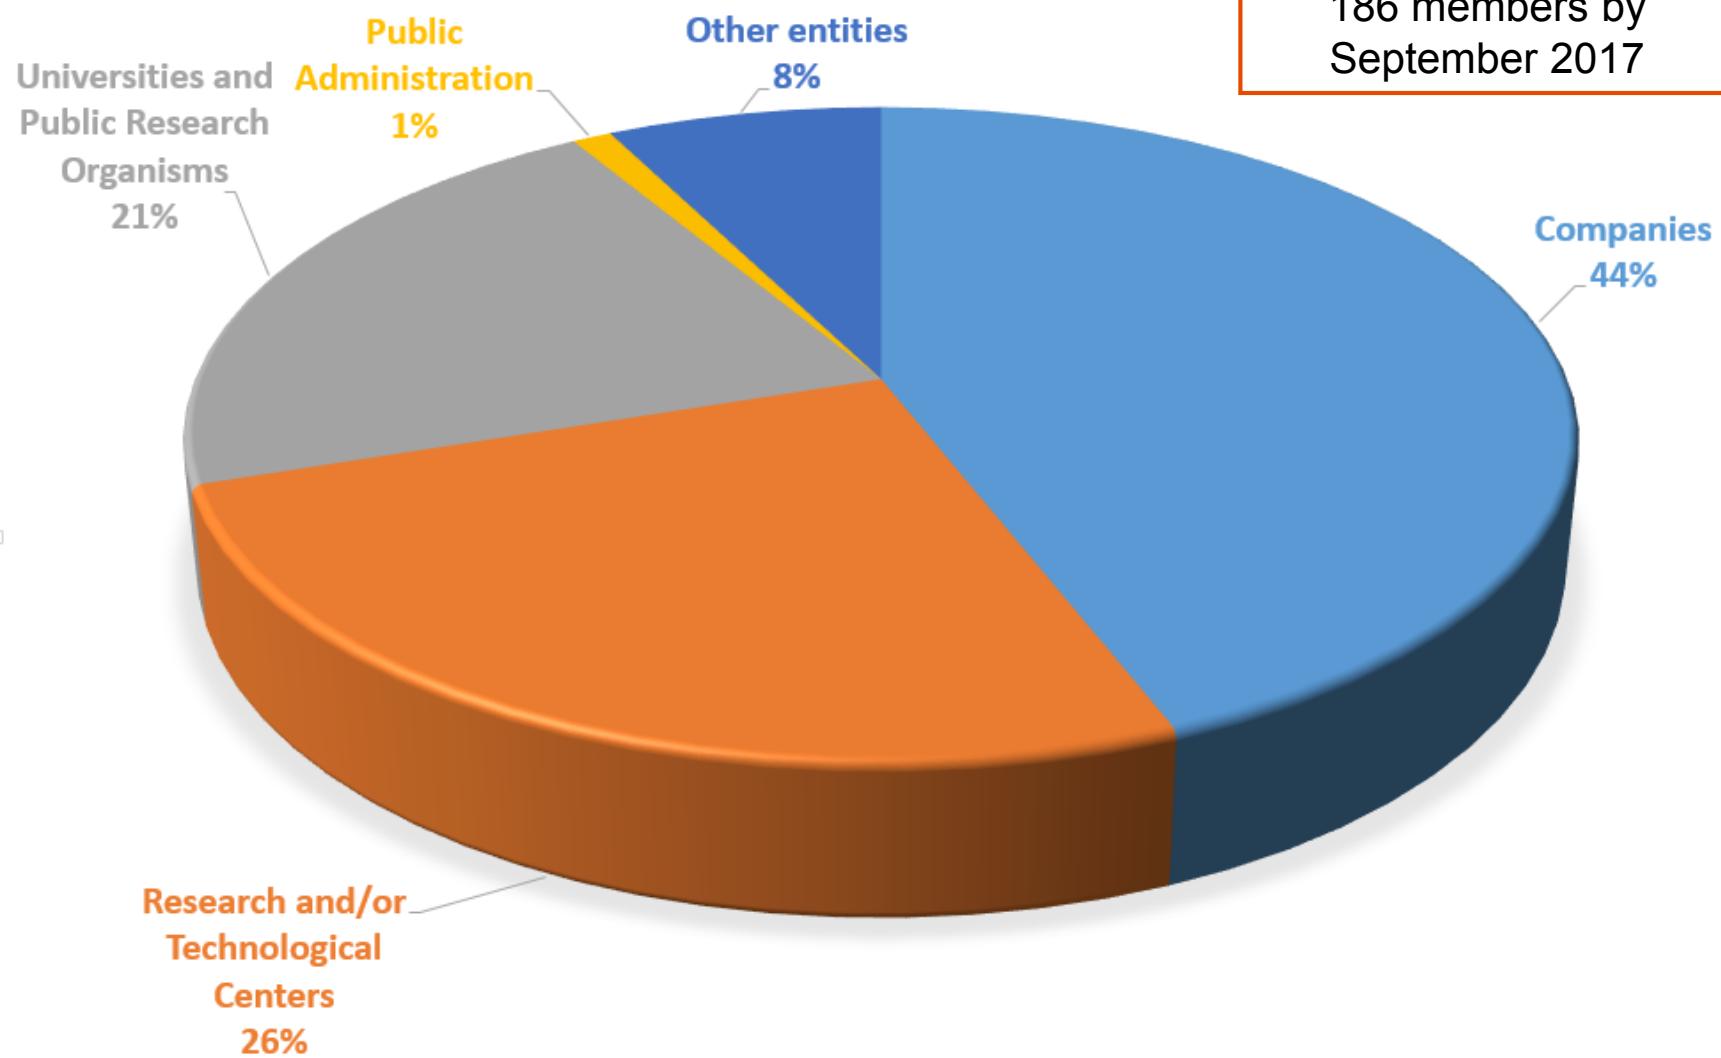

The main goal of the Platform is to **foster and promote Innovation within the R&D&I National System, as a tool and key instrument to improve and increase the competitiveness of the collective of Spanish companies**, for which materials and nanomaterials, along with their transformation processes, are fundamental elements in the development and commercialization of their products and services.

## WHAT IS MATERPLAT?

## MEMBERS OF MATERPLAT

## SOME OF OUR MEMBERS

KERABEN GRUPO

B/S/H/

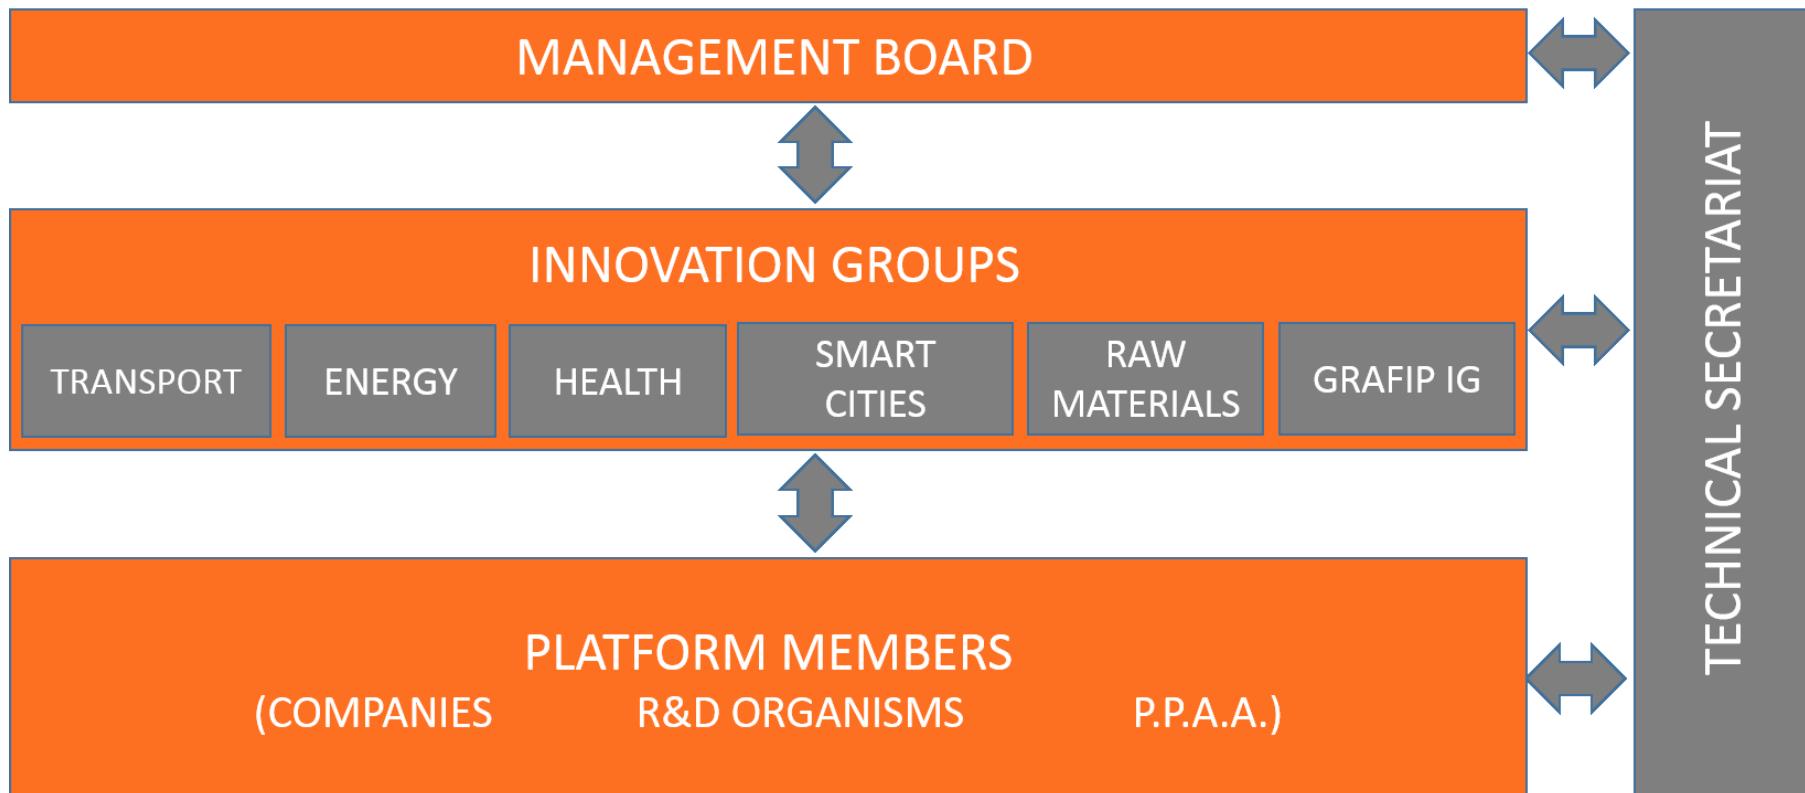

## Public Bodies that support MATERPLAT:

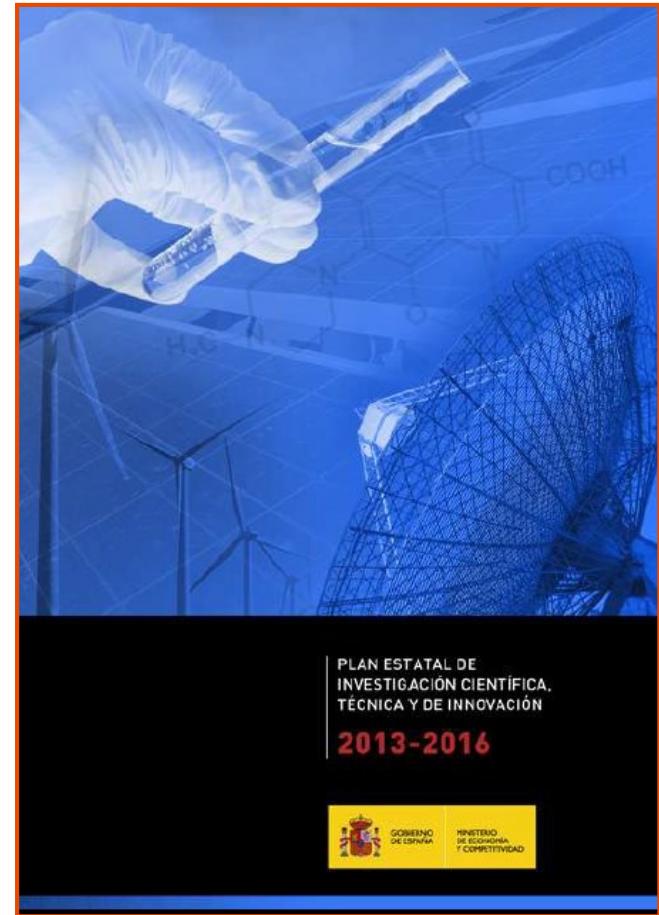

## STRUCTURE OF THE PLATFORM

- 1. Innovation Groups (work groups) focused on the Societal Challenges**
- 2. Dissemination of technological information and capacities of the platform members**
- 3. Foster collaboration with other national technological platforms from other sectors**
- 4. Internationalization of MATERPLAT (collaboration with European Platforms and other organizations)**
- 5. Coordination of the Interplatform Graphene Group (GRAFIP)**

## SOCIETAL CHALLENGES

THE KEY LIES  
IN THE  
SOCIETAL  
CHALLENGES

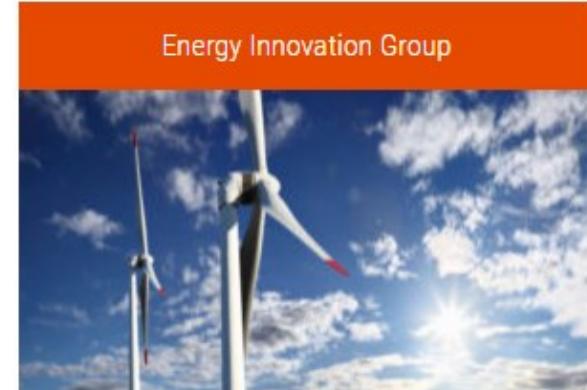

Transport Innovation Group

Health Innovation Group

Energy Innovation Group

Raw Materials Innovation Group

Smart Cities Innovation Group

The main purpose of the Advanced Materials and Nanomaterials Spanish Technological Platform (MATERPLAT) is fostering and promoting innovation in the Advanced Materials and Nanomaterials R&D&I Spanish System, by building a framework of encounter and collaboration between the different agents of the Company, Science and Technology Spanish System.

As the final objective of MATERPLAT is the improvement and increase of the competitiveness of the collective of Spanish agents it is also essential to address nowadays **global scenario**.

Therefore, **one of the main goals of MATERPLAT comprises gaining international relevance**, in such a way that the platform can act as a channel that fosters R&D&I collaborations between its members and institutions from other countries, allowing the Advanced Materials and Nanomaterials Spanish sector to acquire a larger dimension.

MATERPLAT offers to entities external to the platform, its **dissemination channels** as well as a set of **collaborative tools** including a section to disseminate collaborative projects for a given call, that are in need of a partner of specific characteristics.

The image shows a screenshot of a LinkedIn company profile for 'MATERPLAT - Plataforma Tecnológica Española de Materiales Avanzados y...'. The profile includes a banner image featuring three bowls filled with green, yellow, and red polymer granules. The LinkedIn interface shows standard navigation tabs like 'Inicio', 'Perfil', 'Mi red', 'Empleos', and 'Intereses'. A search bar at the top right says 'Buscar gente, empleos, empresas y demás'. Below the banner, there's a brief description: 'La Plataforma Tecnológica Española de Materiales Avanzados y Nanomateriales (MATERPLAT) se crea en 2008 con la vocación de fomentar y promocionar la innovación en el Sistema de I+D+i Nacional, como herramienta e instrumento clave para la mejora e incremento de la competitividad del colectivo de'.

- 1. Dissemination of EuMaT communications through MATERPLAT (Web, mailing and newsletter)**
- 2. Effective search of Spanish partners (working in the field of materials) for European proposals**
- 3. Job Portal (specific to the search of materials related profiles)**
- 4. Events Co-organization**

- Contact with other platforms and european initiatives

- EUMAT

- ECP4

- NANOFUTURES

- MATCH (European Project)

- International guests for the yearly General Assembly
