

Eureka: Project Partners Search Form

Contact data	
Name: Alejandro Cometto	
Function: Director	
Telephone: +54 9 351 3262227	e-mail: acometto@gmail.com

Organization details	
Name: SOL.AR SRL	
País: Argentina	Web Page: http://www.solarlitio.com.ar
Technological Area:	1 Energy storage and transport (004001)
Type of Organization:	SME
Number of Employees:	< 10
Total Turnover:	1-5 millions
Expertise and core business: We "came" from lead acid batteries manufacture. Year ago we began the development of lithium storage technology. We have a plant for assembly cells, we have a plant to manufacture the cells and we are working in the development of active materials of the cathode. We have a Pilot scale process for recycle lithium batteries. We have a network of agreements with prestigious universities and scientists, mainly in electronics and chemistry.	

Project description

GlobalStars Argentina / Eureka 2018

Project Title:	Manufacture of lithium electrodes and its mains componets
Keywords:	Active lithium battery materials for electrodes. Lithium Electrodes manufacture. Advanced lithium materials.
Project Idea and Contribution	We have developed key aspects in the value chain of the lithium battery. Manufacturing plants running. Research and development network in Argentina.
Project Result	Lithium batteries for different applications with the majority of its components manufactured in Argentina
Targeted Market	Replace imported batteries. Offer accessible lithium products. Offer batteries for ups, ebikes, escooter and batteries for accumulation of renewable energies
Estimated Budget	According to the project that arises

Partners Search	
Type of Partner:	SME, Large Company, University, Research Institute
Target Country(ies) for partnership:	Czeck Republic, Finland, Israel, Spain, Turkey
Technological Area:	1 Energy storage and transport (004001)
Expertise of Partner	We want to develop a long-term alliance with an international strategic partner with a stage of development similar to ours to complement and make synergies
Partner Role	Complementation of productive processes, technologies and products. Share access to our markets.
